Introduction

TOPIC 1: Preparing for Assembly

VIDEO: Assembly Proper

Performance Checklist

H5P Activity: True/False

Introduction

Now that you've learned how to disassemble a PC, we are now going to proceed to assembling what we just disassembled. Ideally, as seen in the last part of the disassembly video, you need to document the specifications/status of the components before putting back the system unit together again.

A helpful tip is since you worked your way part by part in disassembly, now you are just going to retrace your steps in assembling it.

TOPIC 1: Preparing for Assembly

Before going into the assembly proper, you will have to prepare all the materials that you will need.

Make sure to...

Clean the equipment and parts!

Don't let the CPU stay exposed for a long time!

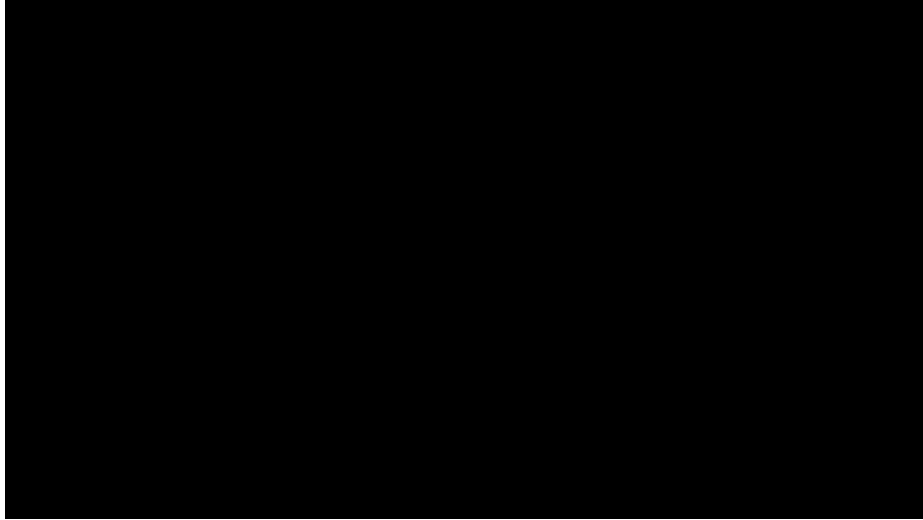

Prepare to re-apply thermal paste!

Wear your anti-static wrist strap!

VIDEO: Assembly Proper

Watch the demonstration video on Computer Assembly below:

Performance Checklist

⚠ If you tried assembling a computer on your own, this checklist might be able to help you if you've done the job correctly.

Check the following if you've met the criteria:

CRITERIA	YES	NO
Did you...?		
1. Clean the equipment and parts before assembly?		
2. Wear anti-static wrist strap and other PPE?		
3. Install the following correctly and carefully:		
a. CPU Fan?		
b. Hard Disk Drive?		
c. Optical Drive?		
d. RAM (Random Access Memory)?		
e. Power Supply?		
f. Interface Cards/Add-on Cards/Adapters Graphics/Video Cards?		
g. System Fan?		
4. Attach the System cover properly?		

H5P Activity: True/False

Thank you for trying out H5P. To get started with H5P read our [getting started guide](#)

It is not necessary to wear anti-static wrist wrap anymore in assembling a computer.
