Introduction

TOPIC 1: Preparing for Disassembly

VIDEO: Disassembly Proper

Performance Checklist

H5P Activity: Arrange the following sequence

Introduction

You might be wondering why the lesson starts with **disassembly** and not **assembly** itself? Simply because we want to learn how to disassemble so we can assemble it again from how we took out the parts.

It is because in the industry, you will be performing disassembly especially in servicing, compared to building a new computer and repairing and maintaining the computers in the workplace. You will have to be familiar especially first with the system unit. We want you to learn how to assemble what you've taken out (disassembled).

It is important that you have taken and reviewed the prerequisite module ([Intro to CSS](#)) before going into this hands-on course.

TOPIC 1: Preparing for Disassembly

Before going into the disassembly proper, you will have to prepare all the materials that you will need.

Make sure to...

- ☒ The system unit you will disassemble is **UNPLUGGED!**
- ☒ Wear your antistatic wrist strap!
- ☒ Lay out the antistatic mat!
- ☒ The table is large and long enough!

VIDEO: Disassembly Proper

Performance Checklist

If you tried disassembling a computer on your own, this checklist might be able to help you if you've done the job correctly.

Check the following if you've met the criteria:

CRITERIA	YES	NO
Did you... ?		
1. Unplug the System Unit before proceeding to disassembling?		
2. Wear anti-static wrist strap and other PPE properly?		
3. Remove the following safely and correctly?		
a. Outer Steel/Casing?		
b. Case Fan?		
c. CPU Fan?		
d. Power Supply?		
e. Memory (RAM)?		
4. Remove the Optical Disk Drive?		
5. Remove the Hard Drive?		
6. Remove the Motherboard?		

H5P Activity: Arrange the following sequence

Thank you for trying out H5P. To get started with H5P read our [getting started guide](#)

Drag to arrange the images in the correct sequence

Wear anti-static wrist strap.

Unplug the system unit.

Remove the power supply.

Remove the motherboard.
